DETAILED ACTION

- This action is responsive to the following communication: an amendment filed on 10/4/07.
- Claims 1-37 have been canceled; claims 38-53 are now allowed, renumbered as claims 1-16.

Response to Arguments

- Applicant's arguments, see pages 8-10, filed 10/4/07, with respect to claim 38 have been fully considered and are persuasive. The 112, second paragraph rejection of claim 38 has been withdrawn.
- Applicant's arguments, see pages 11-16, filed 10/4/07, with respect to claim 38 have been fully considered and are persuasive. The 102(b) rejection of claim 38 has been withdrawn.

Allowable Subject Matter

- Claims 38-53 are allowable over prior art of record, renumbered as claims 1-16.
- The following is an examiner's statement of reasons for allowance: The cited prior art (JP 410116165A to Ishii) of record teaches a printing system for determining the lowest standby print information in a networked printing and route the print job based upon determined print standby information, but the prior art of record fails to teach and/or suggest a printing system comprising a plurality of printers, computers, wherein each printer comprising a controller adapted to determine standby print information indicative of an amount of standby print operations received via the network from all of a plurality of discrete sources and wherein each computer including a memory individually registering network printer information representative of plurality of printers and in combinations of other features as cited in independent claims 38, 45, and 51 (renumbered as claims 1, 8, and 14 respectively). The examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of prior arts that

teaches the above limitations and in combinations of other features cited in independent claims 38, 45, and 51 (renumbered as claims 1, 8, and 14 respectively).
